

A woman with long dark hair, wearing a red one-piece swimsuit with a ruffled neckline and gold hoop earrings, is sitting on a white lounge chair. She is looking down at her legs. The chair is on a wooden deck next to a swimming pool. A large woven basket and a colorful striped clutch bag are on the chair. The background shows a clear blue sky and the edge of the pool.

2024 CATALOG

INTRODUCING RECYCLED FABRIC

At Gottex, we're committed to creating a more sustainable and responsible future for fashion. With our design and product teams constantly pushing the boundaries of style and innovation, we're always looking for new ways to improve our products while minimizing our impact on the environment.

Our fabric is designed to minimize waste and reduce our environmental impact. We prioritize sustainable production methods that conserve natural resources and minimize excess materials and pollution.

Our cycle begins by utilizing neglected materials that would otherwise be discarded. Giving these materials a second life has allowed us to eliminate environmental waste, contributing to a more circular fashion cycle.

Whether you're lounging by the pool or hitting the beach, our recycled fabric will keep you comfortable and stylish in an eco-friendly way.

LYCRA® LastingFIT 2.0 Technology

Shifting our focus to durability has allowed us to generate more sustainable swimwear with designs made from long-lasting fabrics. Lycra's Lasting-Fit Technology has made it possible to create low to high stretch levels, using recycled fibers to maintain a natural touch. Using EcoMade fibers, crafted to endure the wear and tear of aquatic activity, allows consumers to keep their pieces for longer and encourages them to buy our products again and again. By creating more comfortable, high quality, and well-fitting swimsuits we can reduce apparel waste and contribute to a more sustainable future.
